

Mother

EARTH

Mother Earth or Mother Nature, is our home and the place where we live today. All the things such as: the trees, water, metals, minerals and grounds is part of our earth.

Now consider!

What does a mother actually mean or what does a mother actually do? and What did your mum do for you? Certainly your mum cared, fed, nurtured you and kept you safe as you grew.

Now think of for all the good things that your mother did for you, and ponder what have you done in return? Without doubt, most of us do reciprocate love and care that she gave us.

At this moment contemplate about the Mother Nature who made the world inhabitable and through whom we get food, water, clothes, and almost every need of ours. What have you done in return for all the good things Mother Nature has blessed us with?

Well, for most of us, we have done absolutely nothing.

While we all can do something, no matter how small our act may be.

The choice is ours and it is practical too, that we care for the earth we live in. Make your step forward – take care of Mother Nature!

airtel 5th airtel delhi half marathon 30th September, 2012
